**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 11-23, 25-36 and 38-73 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent 4699215, Cuiper.

In regards to claims 1-9, 11-23, 25-36 and 38-73, Cuiper discloses a connector, comprising:

a first end adapted to be coupled to a first component;

a plurality of locking segments (41) that, when actuated, are adapted to secure said first component to a second component, wherein each of said plurality of locking segments comprises:

a first primary locking shoulder that is adapted to engage a first surface on said first component; and

a second primary locking shoulder that is adapted to engage a second surface on said second component; and

a locking mandrel (25, 35, 51) that, when actuated, is adapted to engage each of said plurality of locking segments at at least three discrete, spaced apart engagement areas.

***Response to Arguments***

Applicant's arguments with respect to claims above have been considered but are moot in view of the new ground(s) of rejection.
